Dean's Lister

CERTIFICATION

CompTIA ITF+

May 2021

CompTIA ITF+ is a pre-career certification that demonstrates your basic IT knowledge and skills, covering topics such as computing, infrastructure, software, development, database, and security

PROJECTS

D'Trio Ecommerce Website

Frontend Developer   **2022**

I developed the front end of the ecommerce website for D'Trio coffee, a local coffee syrup retailer. I used HTML, CSS, and JavaScript to create a responsive and user-friendly interface that showcases their products and services.

GravaSend: Digital Transformation for JMIG Gravel and Sand Supply

Frontend Developer   **2023**

GravaSend is a capstone project that digitized the operations of JMIG Gravel and Sand Supply, a local supplier of construction materials. I was the front end developer and UI/UX designer of the project, using material UI, ReactJS, and JavaScript to create a sleek and functional website that allows customers to order, track, and schedule deliveries, as well as an admin dashboard that manages appointments and fleet operations.

Threads and Trends Ecommerce Website

Fullstack Developer   **2023**

Threads and Trends is an ecommerce clothing website that showcases trendy styles for men and women. I was the fullstack developer of the project, using Laravel and TailwindCSS to create a dynamic and responsive website that allows customers to browse, wishlist, and order products, as well as an admin panel that handles orders and users. This was a practice project for me and I used existing resources such as templates and images in developing it.
